PROJECTS

- **Graduation project**
("Seha-App" It is an android app It provides the patient with a list of excellent doctors, who determines the most suitable doctor for him, communicates with him and presents his condition There is also a section for volunteers, including medical devices or supplies, as well as volunteering as a nurse There is also a heat map through which you know the injured around you).
- **Point System**
(Flutter Application for a system for a group of bakeries that works on monthly points with their customers, through which they can spend bread and flour, as well as buy some food items. There is in the application (barcode scanner - schedules for customers and monthly quotas - the ability to print an invoice for the customer in the process with(Wifi &Bluetooth Printer) - statistics about the day and month).
- **School Projects**
(It is a system for schools that allows the student, teacher, and parents to view all school activities (exams, assignments, results, etc.) and also allows communication with each other through internal chat using signal-R, and there is a group chat as well.
There are many examples of this system (Android & ios)).
- **Payments Projects**
(It is a system for electronic payment companies through which it allows making payments and following up operations and balances, and every representative can follow up on his own merchants and follow up on their operations And transferring credit to them, which is used for merchants and delegates, and dealing with a e-khales and Fawry company in connecting services such as electricity, gas , water and other services).

- **Store Projects**

(It is a system for stores, and the customer can purchase through the application, follow up on his requests, and view all new offers).

- **A1**

(It is a project for local and international shipping. The user can send the shipment through the application, follow the movement of the shipment, and communicate with the receiver and the delegate through an internal chat in the application, The application is available to the sender , the receiver and the delegate.

The application contains electronic payment processes

All users can make cash in and cash out through Fawry services).

- **Recruitment**

(It will help the employer to find good employees by conducting interviews and giving the employer a report on the best applicants for the job and following up on everything related to the applicant

It also helps the job seeker to find a good job in his field, and he can search for a job in all countries).
